INTRODUCTION

O

The purpose of this tutorial is to teach you how to download ArcGIS Pro on your own laptop or desktop computer so that you can successfully complete the other Esri ArcGIS Pro tutorials that are available through the UA Libraries. All University of Arizona faculty, staff, and students can download and use ArcGIS Pro for free using your NetID.

Please Note: Esri ArcGIS Pro does not run on Apple computers and can only be downloaded for computers running Windows. If you have an Apple computer you can use ArcGIS Pro via the UA's Virtual Computing Access Technology (VCAT). For more information on using VCAT please visit the following website:

[UA VCAT](#)

Upon completion of this tutorial, you should be comfortable:

1. Downloading Esri's ArcGIS Pro from your Esri ArcGIS Online account.
2. Installing Esri ArcGIS Pro on your own personal computer.

COMPUTER REQUIREMENTS

Before you try and download Esri ArcGIS Pro onto your own personal computer please visit the following website that contains all the hardware requirements to run ArcGIS Pro.

ArcGIS Pro Hardware Requirements

If your computer meets the requirements please proceed to download ArcGIS Pro.

Please complete the following steps to download ArcGIS Pro.

1. Open a web browser and navigate to Esri ArcGIS Online:

ArcGIS Online

Click on the Sign In button.

2. In the Sign in window expand Your ArcGIS organization's URL.

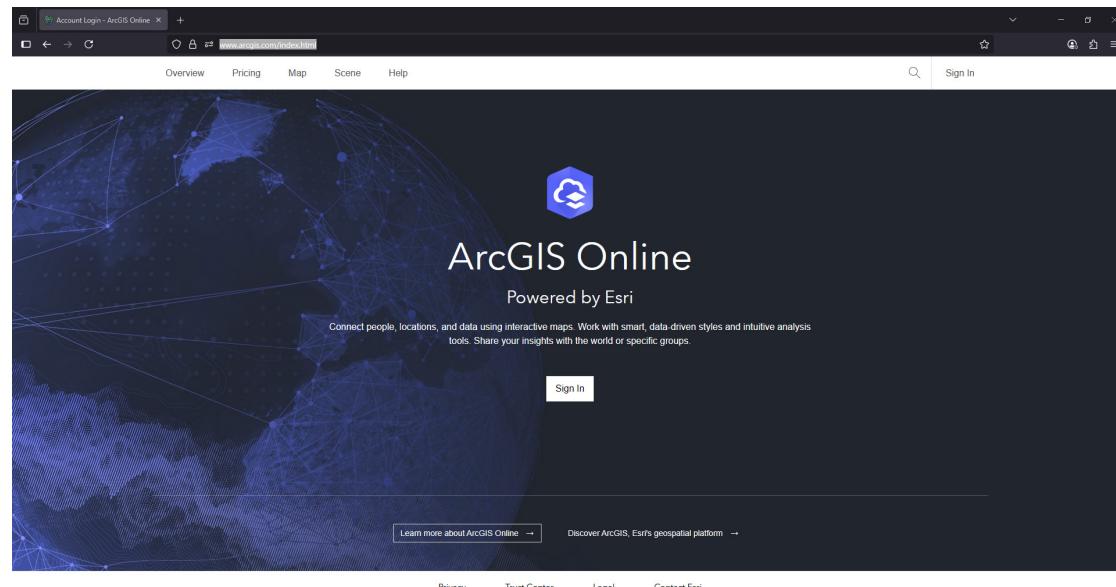

In the Your ArcGIS organization's URL text box enter **uagis**.

Check the box next to Remember this URL.

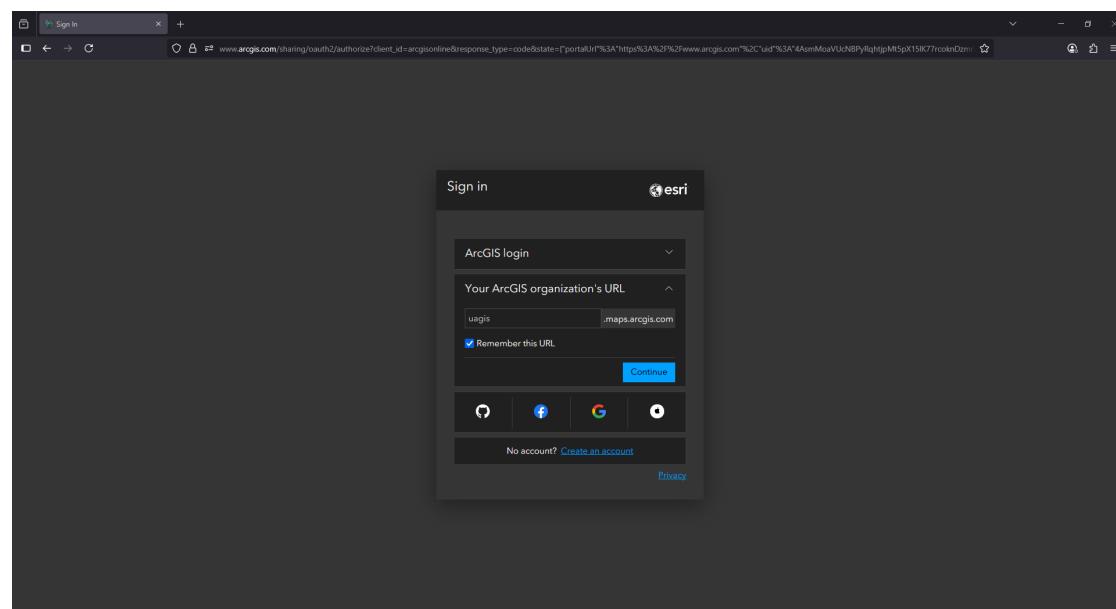

Click Continue.

HELPFUL HINT:

To use Esri ArcGIS Pro you will need to sign-in to your Esri ArcGIS Online account. By checking the box next to Remember this URL you will not have to reenter uagis every time you log-in to ArcGIS Pro.

2

3. In the Sign in to University of Arizona GIS window click USE YOUR UArizona NETID HERE University of Arizona GIS.

You will be directed to the Shibboleth page to enter your NETID and password.

4. On your personal ArcGIS Online page, click on your username on the top right-hand corner of the page and select My settings.

3

4

3

- 5.** In the My settings page click on the Licenses tab on the left side of the page and scroll down to ArcGIS Pro.

Click on the Download ArcGIS Pro button.

- 6.** In the Download ArcGIS Pro window select your preferred language and click Download.

Once the ArcGIS Pro .exe file has downloaded follow the instructions below for how to install ArcGIS Pro on your computer.

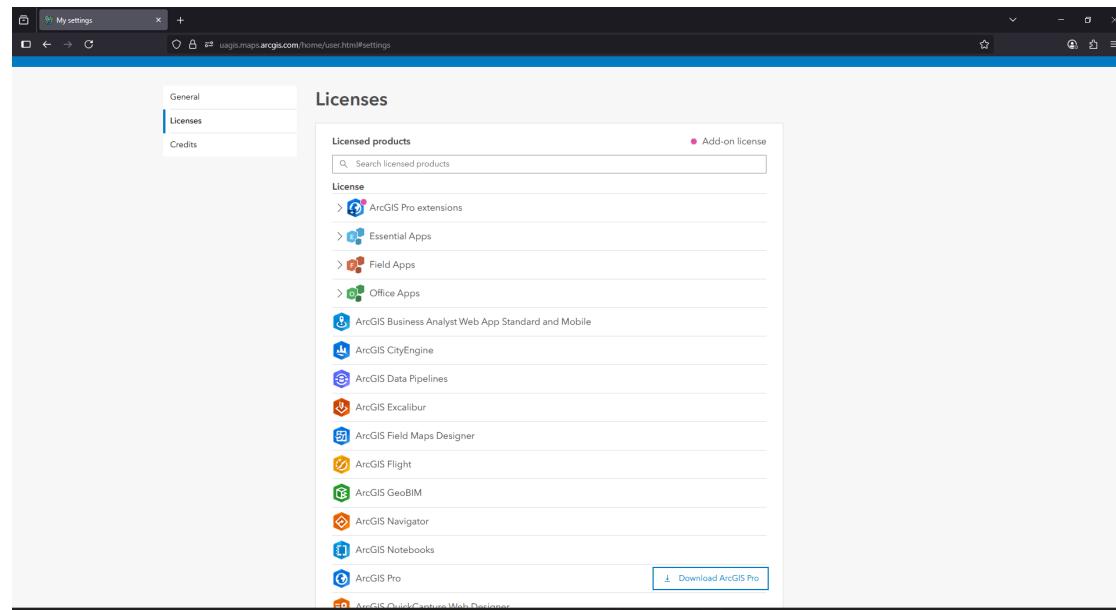

Installing ArcGIS Pro

If you have issues downloading and/or setting up ArcGIS Pro on your computer please reach out to UAIT:

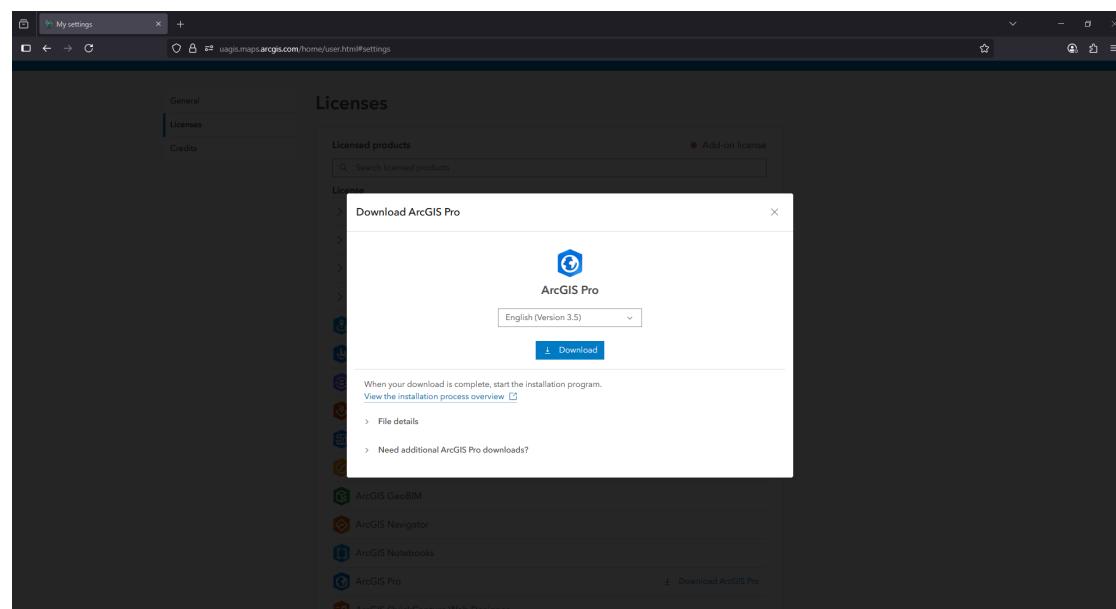

ua_esri-support-request@list.arizona.edu

HELPFUL HINT:

In addition to ArcGIS Pro, Esri offers a number of other spatial related software and online solutions geared towards a wide array of professions that are all available through your UA license. It may be worth your time to look into some of the other options available if you have any additional spatial needs that ArcGIS Pro may not meet.
